

Product Stewardship Policy

Coromandel International Limited is India's pioneer and leading agri-solutions provider, offering diverse products and services across the farming value chain. The Management of Coromandel is committed to making food chain more sustainable and enable farmers to improve productivity and address world hunger.

This policy is to provide products and services that offer best-in-class quality user experience, using sustainably sourced inputs and raw materials. Coromandel has committed to enhance product stewardship and intends to minimize the environmental impacts across the lifecycle of the products and services.

Coromandel will deliver on this commitment through below listed ways:

- Adopting the life-cycle assessment approach to product stewardship
- Existing operations, alterations, substances, new processes, and projects must undergo a rigorous Hazard Identification and Risk Assessment at the site level and ensure safe usage of hazardous substances.
- Producing and selling products that do not pose an unacceptable risk to human and environmental safety when used correctly and for the intended purposes.
- Investing in R&D to design innovative and safer products, as well as engaging in the reduction of environmental footprint, including water consumption, waste production, water and air emissions, and increasing the use of renewable energy.
- Conducting farmer awareness sessions and training program for promoting the use of safety gears and safe practices in agriculture.
- Packaging, labelling, transport, storage and disposal of the products will be in accordance with the FAO guidelines and are committed to use reusable packaging and minimize usage of single-use plastic.
- Maintaining product integrity by ensuring that items are fit for their intended use through quality assurance and quality control.
- Taking necessary steps to improve food security by promoting integrated farm management and reducing the environmental impact of the product's life cycle.

Implementation:

- All Coromandel employees are abided to follow and promote the Product Stewardship Policy. Management clearly requires individual accountability for specific aspects of Product Stewardship.
- In addition to any measures taken to ensure compliance with this guidance document, all applicable statutes, laws, ordinances, rules, regulations, orders, or codes of any government entity dealing with product safety, consumer protection, conservation, pollution control, and other related subjects must be strictly followed.

- To continuously improve its Product Stewardship approach, Coromandel will monitor compliance and review progress
- The CSR and Sustainability Committee will be updated on the Policy's implementation on an annual basis.
- Coromandel will work with its business partners to apply the same level of Product Stewardship and expect all the related parties of the company to operate in accordance with the principles as outlined in this Policy.
