

ACUMIST CALCIUM

AcuMist Calcium® is a premium self-manufactured calcium-based fertiliser available in concentrated liquid form. It has 11% calcium in liquid form which has higher efficiency as it is fast acting and readily corrects the calcium deficiency in crops.

Pack Sizes: 100ml, 250ml, 500ml and 1Litre

Features

- AcuMist Calcium® is a foliar spray fertiliser.
- It contains high concentration of calcium (11%) in liquid form.
- The product is specifically formulated to ensure maximum safety to the crops.
- Rapid action with good mobility within the plant.
- It has suitable stabilizers and sticking agents for best stability and efficiency of product.

Benefits

- AcuMist Calcium® is a liquid formulation which allows higher calcium availability to the plant.

- It makes the cell wall strong, which increases resistance to pests & disease.
- Acumist calcium application during the flowering stage of the crop stimulates internal chemical pathways which promotes fruit set, resulting in increased fruit yields.
- It generates better return on investment for farmers as it is economical with low application rates.
- It helps in rectifying some major calcium disorders like blossom end rot in tomato, bitter feet in apple, black heart in leafy vegetables.

Dosage and Application

- 3-5 ml/ litre of water (depending on the crop).
