

ACUSPRAY COTTON

A 100% water-soluble foliar application fertiliser, this is customised for higher yields of cotton under Indian conditions.

Pack Size 1 Kg

Features

- Contains 11:00:37 (N:P:K) & Zn, B, Mg
- Crop Specific customised solutions.
- Combination of five most important nutrients for cotton.
- Along with Nitrogen and Potassium, meets the crop demand of critical micronutrients Zinc and Boron and secondary nutrient Magnesium during boll development.
- Customised for solution pH for better absorption by the plants.

Benefits

- More bolls per plant, higher boll weight and hence higher yield.
- Increased staple length and strength.

- Reduced flower and boll drop.

Dosage & Application

Gromor AcuSpray Cotton SP should be applied at 10grams/litre of water during pre-flowering, boll initiation and boll development stage.
