

## GODAVARI BHUBHAGYA

Enriched with Nitrogen fixing bacteria and Phosphorous solubilising bacteria which helps to increase the use efficiency of NPK and other essential nutrients. Rejuvenates and revitalizes the soil in a sustainable way.

**Pack Size 50 KG**

### Features

- It contains minimum 14% of Organic Carbon.
- It contains beneficial microbes – 50 lakh per gram of product.
- It contains minimum 3% of primary nutrients. (N, P as  $P_2O_5$  and K as  $K_2O$ ).
- It is the unique combination of Organic Carbon, Nutrient and Beneficial Microbes.
- It is available in granular form.

### Benefits

- Godavari BhuBhagya revitalises the soil by improving the physical (water holding capacity, soil aeration, soil structure etc.), chemical (Cation Exchange Capacity, pH, EC, OC, Total Nitrogen) and biological (beneficial microbes) properties of the soil.

- It ensures that P & K in the soil is available to the crops. It fixes atmospheric Nitrogen as well.
- It also provides primary nutrients which are most critical for overall growth and development of the plant.
- Its unique combination of organic carbon, nutrients and beneficial microbes makes it a balanced Organic fertiliser which takes care of nutrition and soil health in a holistic way.
- It boosts the crop yield and quality of the produce.
- It is in granular form which is easier to apply.

## Composition

Organic Carbon (minimum) – 14%. Total microbial count – 50 lakh per gram of product i.e.  $5 \times 10^6$ /gram. N, P as  $P_2O_5$  and K as  $K_2O$  (minimum) – 3%

## Dosage & Application

At the time of sowing or transplanting: 50 – 100 kgs/ acre
