

EEZYKIL ULTRA

Eezykil Ultra is a pre-emergent herbicide having Pendimethalin 38.7% CS formulation. It targets grasses and broadleaf weeds.

Pack Size 175ml, 350 ml, 700 ml & 3.5 L

Features

- Pre-emergent herbicide targeting grasses and broadleaf weeds.
- Long-lasting residual activity providing extended weed control after application.
- Better efficacy.

Other details

- Category: Dinitroanilines group
- Mode of Action: Eezykil Ultra disrupts cell division disallowing the weed seeds to germinate.
- Compatibility: Not compatible with strong alkaline material, acid or oxidising materials.
- Phytotoxicity: No phytotoxicity when applied as per the label recommendation.

Crop Application

Crop	Weeds	Dose
Chilli	<i>Echinochloa colonum</i> , <i>Dinebra arabica</i> , <i>Brachiaria mutica</i> , <i>Portulaca oleracea</i> , <i>Amaranthus spp.</i> , <i>Commelina spp.</i> , <i>Parthenium hysterophorus</i> , <i>Digera arvensis</i> , <i>Physalis minima</i>	600 – 700 ml/acre
