

GROMOR ULTRA 10:26:26

A Zinc fortified fertiliser containing 0.5 % Zinc is essential for better yield and quality.

Pack Size 50 KG

Features

- Unique grade from Coromandel.
- Contains Phosphorous and Potassium in 1:1 ratio with Nitrogen, hence ideal for basal applications and top dressing.
- Phosphorous is available in mostly water-soluble form and easily available to crops.
- It is a Zinc fortified fertiliser containing 0.5 % Zinc which is essential for better yield and quality.
- It ensures uniform application of Zinc into soil.

Benefits

- Gromor Ultra helps in balance nutrition. It is ideal for crops like paddy, sugarcane, potato, maize, wheat, vegetables, chilli etc.
- It helps in plant metabolism, improves crop vigour, flowering and fruit setting, leading to better yield and quality.
- It helps in increasing Zinc concentration of foods, thus reduces the Zinc deficiency in humans.

Role of Zinc in different crops

- Sufficient supply of Zn during initial stages increases resistance against scab and improves skin finish in potato. In paddy, Zinc reduces the incidence of Khaira disease.
- Zinc is particularly important for better tolerance of crop plants under various stress factors such as drought, heat and salinity.

Dosage and Application

Crop	Time of application	Quantity Kg per Acre
Potato	Basal	300
	Top Dressing	50
Paddy	Basal/Top Dressing	100
Sugarcane	Basal	100
	Top Dressing	50
Vegetables	Basal	100
