

## PARAMFOS

With Nitrogen at 16%, Phosphorus at 20% and Sulphur at 13%, this fertiliser is the most preferred one in drill-sown areas and ideal for sugarcane, groundnut, maize etc.

**Pack Size 50 KG**

### Features

- Paramfos 16-20-0-13 is Ammonium Phosphate Sulphate containing Nitrogen, Phosphorous and Sulphur.
- Nitrogen completely in Ammonical form.
- More than 85% of Phosphorus in Paramfos is present in water soluble form, highest percentage among available complex fertilisers.
- It also contains 13% Sulphur.

### Benefits

- Nitrogen: The Ammonical form ensures Nitrogen to crops for longer duration. Losses due to evaporation, leaching etc. are avoided. Increases the chlorophyll content and gives greenness to the crop.
- Phosphorus: It improves growth of roots and gives strength to the crop.

- Sulphur: Improves the soil health and increases the nutrient intake to the crops. Increases the quality and quantity of the yield especially in oil seeds and sugarcane.

## Dosage & Application (kg per acre)

GROMOR Paramfos is the most preferred fertiliser in drill-sown areas.

Ideally suitable for Paddy, Maize, Groundnut and Sugarcane: 100 kg, Pulses & Ragi: 80 kg
