

## RUKAWAT X

This herbicide has Quizalofop ethyl which is a selective, systemic and post emergence herbicide and works against grasses.

**Pack Size 100 ml, 250 ml, 500 ml, 1L & 5L**

### Features

- Rukawat X is a Selective, systemic and Post-emergence herbicide against grasses.
- Rukawat X can be used in wide range of crops like soybean, pulses and vegetables.
- Rukawat X can manage the weeds efficiently which are usually difficult to control.

### Other details

- Category: Aryloxy phenoxy-Propionates group
- Mode of Action: Rukawat X is a selective herbicide and inhibits fatty acid synthesis, leading to eventual death of the targeted weed plants.
- Compatibility: Compatible with other post emergent herbicides of soybean.
- No phytotoxicity when applied as per the label recommendation.
